Birational Classification of Algebraic Varieties

January 11th, 2019 - Suppose that $P \rightarrow V \rightarrow V^1 \rightarrow P \rightarrow V^2$ if we put $V^1 = V^2 = P \rightarrow V$ Then for a singular algebraic variety $P \rightarrow V$ where V is a non singular model of V then P is a birational invariant There are several birational invariants which play the important roles in classification theory of algebraic varieties
