Oxidative Stress, Prooxidants, and Antioxidants: The Interplay

May 18th, 2013 - Oxidative stress is a normal phenomenon in the body. Under normal conditions, the physiologically important intracellular levels of reactive oxygen species (ROS) are maintained at low levels by various enzyme systems participating in the in vivo redox homeostasis. Therefore, oxidative stress can also be viewed as an imbalance between the prooxidants and antioxidants in the body.

Copper - Wikipedia

December 8th, 2018 - Copper is a chemical element with symbol Cu from Latin cuprum and atomic number 29. It is a soft, malleable, and ductile metal with very high thermal and electrical conductivity. A freshly exposed surface of pure copper has a pinkish-orange color. Copper is used as a conductor of heat and electricity, as a building material, and as a constituent of various metal alloys, such as sterling.

Copper IUDs: What your doctor doesn't know may be harming you

November 8th, 2016 - Find nutrition facts, nutritional information for a healthy body, depression symptoms, anxiety, methylation, epigenetic causes, copper toxicity, pyroluria.
